

GRAPH #1

INTERPRETING DIFFERENT PEAKS

INTERNAL REFERENCE

“Sharp” peak centered at 360-390nm

D9 or D8 INDICATOR PEAK

“Broad” peak centered at 450-470nm

CHLOROPHYLL

Typically shows up as 2 separate peaks, one at 660-670nm, and the other at 710-730nm

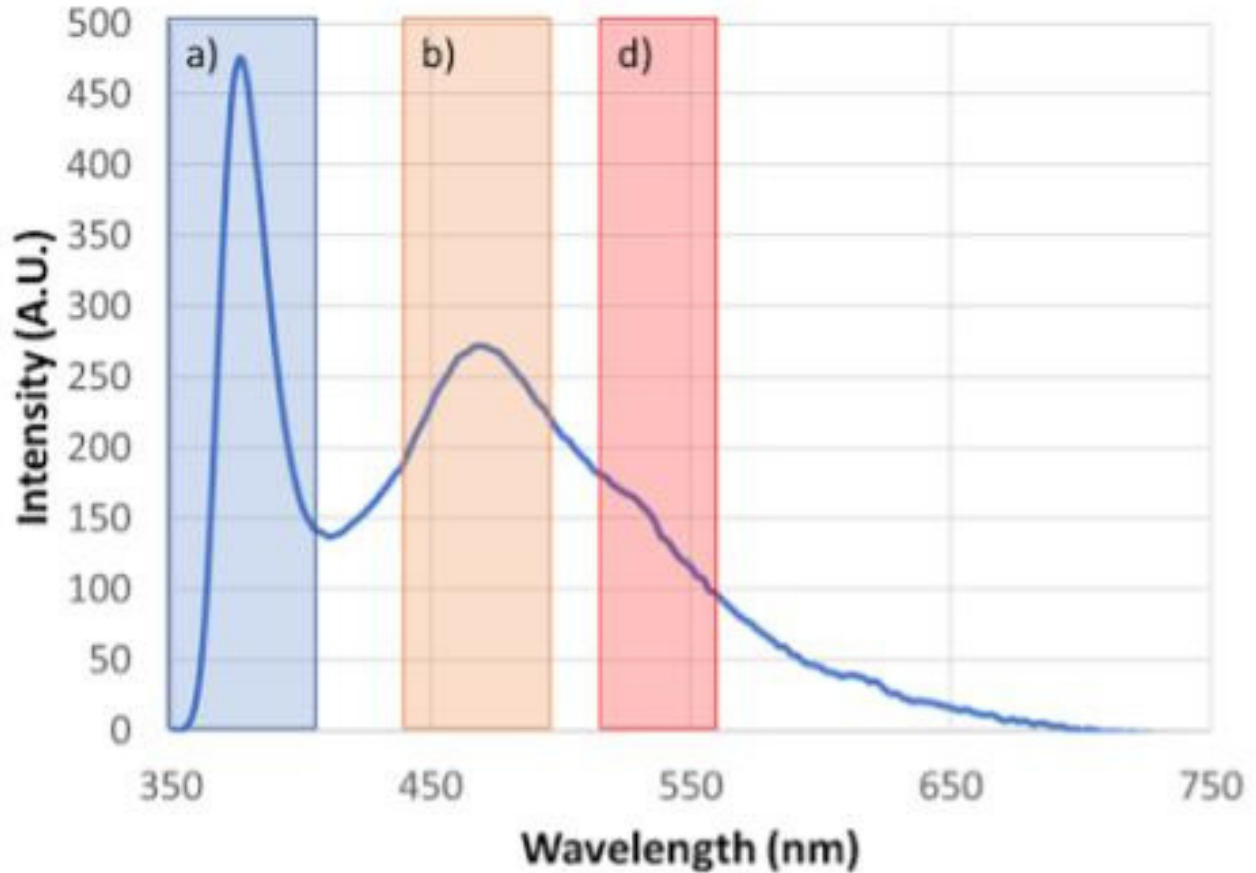

** If only one of these peaks shows up, it is still Chlorophyll*

AROMETRIX

GRAPH #2

INTERPRETING DIFFERENT PEAKS

INTERNAL REFERENCE

“Sharp” peak centered at 360-390nm

D9 or D8 INDICATOR PEAK

“Broad” peak centered at 450-470nm

CBG INDICATOR PEAK

Typically very small shoulder peak on D9, and is centered at 520-540nm. Will look like D9 peak has a bump.
